San Jose, CA Cabinets - Installation & Remodeling | 7/5/2006 at 9:31pm: 'Quality Handcrafted Cabinetry at a Price You Can Afford!'

We absolutely will do business with David Baeza of Woodenbridge again.

He designed, built, finished and installed two custom bookcases and a wet bar in our family room. It's all "real" wood, not plywood. Nice quality maple and cherry.

Basically we got top-quality custom cabinets for about the price we would have paid for pre-fab from Home Depot!

David was creative and very helpful at interpreting our design ideas. His installers were professional and efficient. There was a small mistake with one of the cabinets so they took it back to the shop, corrected and had it back to install the next day.

David Baeza takes personal pride in his work and that of everyone associated with his company. As a result, we are thrilled with the finished results and highly recommend this company to all our friends and family! We will be using Woodenbridge again when we do more cabinet work in the kitchen as well as for a media/entertainment center soon.

Pros: High Quality, Affordable Price, Work Done on Time

Cons: none!
