Subject: RE: Cabinet Shelves?

Hi Tammy and David!

Yes! Everything is just wonderful and I love my new kitchen! It is just as David and I discussed and it all works so wonderful...there is NOTHING I would change about the design!

The pull out drawers are deep enough for my pots and pans, (one of my biggest concerns!) and there seems to be a place for everything! It looks just like fine furniture in my dining area and I have received nothing but compliments on it! The color is perfect, the cabinets are the best quality I've ever seen and I know they will be fantastic for years to come!

The fellows were great to work with, a real pleasure to have in my home. I don't think things could be better than this!

I do have one more request however.... I was wondering if I could possibly squeeze in another pullout in my lower cabinet that wraps around the corner of the kitchen. (the one under the glass cabinet). I keep my table linens in these drawers and it looks like we could fit another one in there. What would that cost? (If it is possible)

I also have to get a price from you to refit my existing drawers in my bathroom (7 in all) with new boxes and "pull in" hardware". Although this is a new piece I don't like the boxes or the hardware on it...yours are so much better!

No hurry on ithope to get it done by summer.

Once again, thank you ever so much. You, David and Manuel and your staff are awesome!
